

Septihol® Alcohol Solution is a blend of 70% (v/v) USP isopropyl alcohol and 30% USP Purified Water designed to remove organic and inorganic residue from hard, non-porous surfaces. Septihol Alcohol Solution does not contain stabilizers or denaturants, so it evaporates quickly and completely. It is ideal for the removal of process residues and for routine glove decontamination. This product has an extensive documentation package to meet your validation objectives and is supported by the STERIS Technical Services team for individualized application and validation assistance.

# Septihol® Alcohol Solution

Ideal for removal of process residues and routine glove decontamination

FEATURES	BENEFITS
Formulation is ready to use without any mixing	Easy to use and saves the time and labor of disinfectant preparation Eliminates errors in dilution preparation and the need to validate preparation procedures
Ergonomically designed bottle with attached trigger spray	Eliminates need to assemble the product
Evaporates quickly	Ability to maintain visibly clean facilities without rinsing after every application
Formulated without stabilizers or denaturants	Least amount of residue left on surfaces
Superior material compatibility	Allows for high frequency use on most surfaces
Filtered to 0.22 micron	Reduces particulate levels
Sterile version is gamma irradiated and each lot USP sterility tested	Facilitates introduction into your critical areas
Manufactured in accordance with cGMP with complete lot traceability	Supports quality assurance and quality control

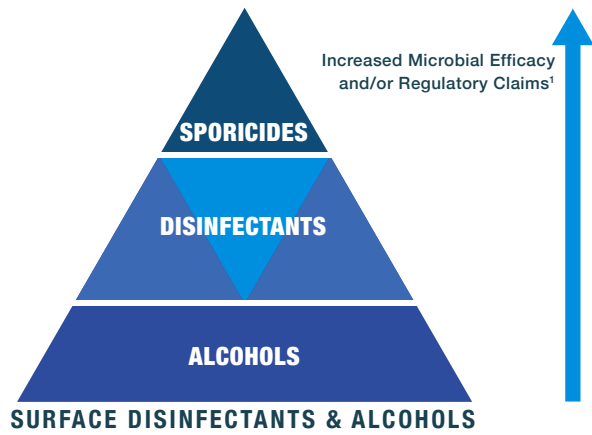

## APPLICATIONS

Removal of process residues from:

- Equipment
- BSL hoods
- Countertops
- Gloves
- Laminar flow curtains
- Windows

Products may be applied by:

- Wiping
- Spraying

<sup>1</sup>Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

An important aspect to any cleaning program is including rinsing on some frequency to control residues. Nearly all chemistries used to maintain a clean environment will leave some type of residue behind from surfactants or stabilizers. Residues may lead to failures in visual cleanliness, or cause concerns with the surface functionality. When removing residues, it is important to use products that do not simply leave behind a different residue. Septihol Ready to Use Alcohol Solutions are ideal for this important application. Our Technical Service group can help customize your contamination control program to take advantage of this excellent product.

## ORDERING INFORMATION (Worldwide)

### Septihol Alcohol Solution

Filtered for consistent quality for use in a variety of areas

22 oz trigger sprayer	12 per case	625477
1 gallon (3.78 L) bottle	4 per case	625408
5 gallon pail	each	625405
55 gallon drum	each	625401

### Septihol Sterile Alcohol Solution

Double bagged and gamma irradiated through a validated process for easy introduction into your aseptic areas

			Europe	China
16 oz (473 mL) trigger sprayer	12 per case	6248Y4	6248Y4EC	6248Y4CN
32 oz (946 mL) trigger sprayer	12 per case	624896		
1 gallon (3.78 L) bottle	4 per case	624808
