

The LpH III Disinfectants are specifically formulated for the routine disinfection of hard, non-porous surfaces. The LpH III Disinfectants that are processed and packaged differently for specific applications. At a use dilution of rate of 0.8% v/v (1:128), the LpH III Disinfectants kill a broad spectrum of common bacteria and fungi. The acidic LpH III Disinfectant formulation can be used alone or in rotation with the Vesphene® III Disinfectants. These products have an extensive documentation package to meet your validation objectives and are supported by the STERIS Technical Services team for individualized application and validation assistance.

LpH[®] III Disinfectants

Our latest low pH phenolic disinfectant

FEATURES

Proven tuberculosis (*Mycobacterium tuberculosis*, var. bovis) efficacy

Broad spectrum efficacy against bacteria, fungi, and viruses using AOAC protocols

Superior material compatibility

Formulated with biodegradable surfactants

Active ingredients are ortho phenylphenol (OPP) and ortho benzyl para chloro phenol (OBPCP)

Sterile version is gamma irradiated and each lot USP sterility tested

Manufactured in accordance with cGMP with complete lot traceability

BENEFITS

Indicative of potential efficacy against less challenging microorganisms

Confirms efficacy against many common microbes

Allows for high frequency use on most surfaces

Reduces environmental impact of disposal while maintaining excellent cleaning ability

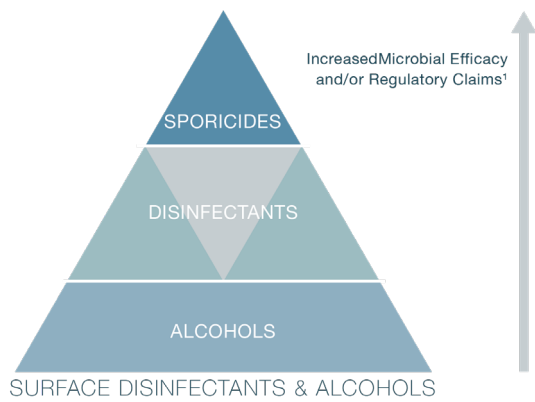

Registered by the United States Environmental Protection Agency (EPA)

Introduces minimal bioburden into your facility

Supports quality assurance and quality control

APPLICATIONS

- Surface disinfection and microbial control :
 - Floors
 - Walls
 - Ceilings
 - Countertops
 - BSL hoods
 - Carts and other equipment
- Products may be applied by:
 - Mopping
 - Wiping
 - Spraying

*Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

The foundation of any contamination control program is the disinfectant that should be used daily. Disinfectants should be used on a scheduled rotation with a sporicide based on your environmental data. Historically, multiple disinfectants have been rotated, but if your disinfectant has broad spectrum efficacy, this is not required. Either used alone or rotated with the alkaline Vesphene III Disinfectant family, the acidic LpH III Disinfectants offer excellent material compatibility for daily use. Our Technical Service group can help customize your contamination control program to take advantage of this excellent product.

ORDERING INFORMATION

LpH III se Disinfectant

Filtered for consistent quality for use in a variety of areas

United States		
1 gallon bottle	4 per case	6470-08-26
5 gallon pail	Each	6470-05
55 gallon drum	Each	6470-01
Canada		
3.78 L bottle	4 per case	6470-08CA
18.93 L pail	Each	6470-05CA
208.18 L drum	Each	6470-01CA

LpH III st Disinfectant

Double bagged and gamma irradiated through a validated process for easy introduction into your aseptic areas

United States		
2 fluid ounce pouch	144 per case	1S18-29
